Customer Churn & Retention Intelligence Platform

PROJECT 2: CUSTOMER RETENTION & CHURN PREDICTION SYSTEM

EXECUTIVE ANALYTICS BRIEFING

Report Type:	Comprehensive Master Intelligence Report
Generation Date:	October 28, 2026
Dataset Status:	Deterministic Synthetic Benchmark Dataset (1,250 records)
Active Filter Scope:	Period: all | Plan: all | Channel: all
Primary Objective:	Identify behavioral patterns, segment at-risk customers, and deploy targeted retention playbooks.

OVERALL CHURN RATE

28.5%

356 of 1250 customers

[1] 56,169

[1] 21,69,981

15.6 Mos

METHODOLOGICAL NOTE & DISCLAIMER:

Prototype demonstration for MBA business analytics. All customer records, churn scores, and projected outcomes use illustrative data and do not represent actual corporate earnings or guaranteed retention results.

Macro Churn Assessment & Strategic Directives

Customer churn is measured at 28.5% across 1,250 analyzed accounts, with ¹56,169 of active MRR currently at elevated risk.

Key Empirical Observations:

- Early tenure vulnerability: Cohorts with < 3 months tenure exhibit a 35.4% churn rate, highlighting an onboarding adoption cliff.
- Plan tier divergence: The Professional tier experiences the highest churn at 31.9%, contrasting with Enterprise at 20.9%.
- Channel variance: Referral yields the highest churn (31.3%), while Direct delivers superior retention (74.2%).

Metric Indicator	Value	Methodology & Definition
Total Analyzed Customers	**1,250 accounts**	Complete customer census in active filter scope.
Active Subscribers	**894 accounts**	Currently active recurring accounts in good standing or at risk.
Historical Churned Accounts	**356 accounts**	Subscribers who canceled or lapsed during the observation window.
Overall Customer Churn Rate	**28.5%**	Formula: (Churned Customers / Total Customers) × 100.
Customer Retention Rate	**71.5%**	Formula: (Active Retained Customers / Total Customers) × 100.
High-Risk Active Accounts	**31 accounts (3.5%)**	Active subscribers scoring >= 70 on transparent behavioral risk engine.
Monthly Recurring Revenue at Risk	**¹56,169**	Sum of monthly subscription revenue from active high-risk accounts.
Total Active MRR	**¹21,69,981**	Total recurring monthly cash flow from current active base.
Avg Customer Tenure	**15.6 Months**	Mean subscription duration across the analyzed cohort.
Monthly Revenue Lost to Churn	**¹7,90,419**	Monthly revenue drain associated with past cancellations.

Bivariate Risk Correlates & Sample Size Transparency

Note: Analysis identifies empirical associations between observed customer behaviors and historical churn. Correlation does not imply direct causality.

Behavioral Dimension	Cohort Bracket	Sample Size (N)	Churn Rate (%)	Relative Risk	Statistical Adequacy
Login Frequency	0-2 Logins/mo	124 accounts	**85.5%**	**3x**	Adequate Sample
Login Frequency	3-7 Logins/mo	220 accounts	**62.7%**	**2.2x**	Adequate Sample
Login Frequency	8-15 Logins/mo	304 accounts	**28.6%**	**1x**	Adequate Sample
Login Frequency	16+ Logins/mo	602 accounts	**4.2%**	**0.15x**	Adequate Sample
Feature Usage	Low (0 - 30)	220 accounts	**77.3%**	**2.71x**	Adequate Sample
Feature Usage	Moderate (31 - 55)	262 accounts	**45.4%**	**1.59x**	Adequate Sample
Feature Usage	Healthy (56 - 75)	391 accounts	**12%**	**0.42x**	Adequate Sample
Feature Usage	Power User (76 - 100)	377 accounts	**5.3%**	**0.19x**	Adequate Sample
Payment Retries	0 Failures	1075 accounts	**21.5%**	**0.75x**	Adequate Sample
Payment Retries	1 Failure	75 accounts	**56%**	**1.96x**	Adequate Sample
Payment Retries	2 Failures	66 accounts	**77.3%**	**2.71x**	Adequate Sample
Payment Retries	3+ Failures	34 accounts	**94.1%**	**3.3x**	Caution: Small Sample
Auto-Renewal	Renewal Enabled	1029 accounts	**27.3%**	**0.96x**	Adequate Sample
Auto-Renewal	Renewal Disabled	221 accounts	**33.9%**	**1.19x**	Adequate Sample
Contract Type	Annual Contract	457 accounts	**26.9%**	**0.94x**	Adequate Sample
Contract Type	Monthly Contract	793 accounts	**29.4%**	**1.03x**	Adequate Sample

Behavioral Clustering, Value Distribution & Playbook Matrix

Segment Name	Active Base (%)	Total MRR	Avg Revenue	Avg Risk	Hist. Churn	Strategic Retention Playbook
High-Value At Risk	9 (1%)	**₹43,941**	₹4,882	44/100	60.9%	High-touch executive outreach, white-glove success review, priority SLA guarantee, and custom contract restructuring.
Payment Friction	71 (7.9%)	**₹1,99,929**	₹2,816	46/100	69.7%	Automated dunning sequence via SMS/WhatsApp/Email, grace period extension, UPI autopay incentive.
Support-Heavy Customers	58 (6.5%)	**₹1,38,042**	₹2,380	57/100	63.5%	Direct escalation to L3 Technical Account Manager, bug resolution SLA fast-track, feedback interview.
Low Engagement	84 (9.4%)	**₹1,98,516**	₹2,363	31/100	28.2%	Targeted in-app feature checklists, re-engagement email sequence with ROI calculators, workflow templates.
New Customers Needing Onboarding	55 (6.2%)	**₹1,35,120**	₹2,457	6/100	15.4%	Interactive guided tour, 1-on-1 onboarding webinar, milestones-based adoption incentives.
Loyal & Engaged	456 (51%)	**₹10,58,169**	₹2,321	3/100	3.8%	Customer advocacy program, early beta access, referral incentive bonus, annual contract upsell.
Stable Subscribers	161 (18%)	**₹3,96,264**	₹2,461	7/100	9.6%	Periodic value digests, feature enhancement updates, gentle annual contract upgrade prompts.

Tailored Interventions, Timelines & Economic Projections

Target Account / Segment	Priority	Timeline	Prescribed Intervention	Business Rationale	Cost/Acct	Exp. Win%
High-Value At Risk Segment	**Urgent**	Immediate (24 hrs)	Initiate Executive Value Review & Dedicated Technical Architect Alignment.	High MRR exposure warrants personalized white-glove intervention; standard email automation is insufficient for high-tier accounts.	₹1,500	**42%**
Payment Friction Segment	**Urgent**	Immediate (24 hrs)	Deploy Multi-Channel Smart Dunning (SMS, WhatsApp & In-App Banner) with UPI Autopay Links.	Involuntary churn from expired payment instruments is highly preventable with minimal cost and immediate execution.	₹120	**58%**
Support-Heavy Customers Segment	**High**	Within 48 hrs	Schedule Priority Engineering Triage & Root-Cause Remediation Call.	Repeated friction drives customer frustration and eventual churn; resolving core blockers restores confidence.	₹850	**38%**
Low Engagement Segment	**Medium**	Within 7 days	Launch Dynamic Re-Engagement Drip with Tailored Workflow Templates & ROI Highlights.	Customers who fail to integrate workflows into daily habits abandon software; targeted guidance sparks renewed adoption.	₹180	**24%**
New Customers Needing Onboarding	**High**	Within 48 hrs	Deploy Interactive Guided Setup Wizard & Milestone Completion Badges.	Bridging the initial time-to-value gap dramatically lowers day-90 churn and establishes usage momentum.	₹250	**48%**
Account CUST-1312 (Enterprise)	**Urgent**	Immediate (24 hrs)	Deploy Automated Smart Dunning & UPI/Card Grace Period Alert.	Prevent involuntary churn driven by recurring invoice collection failures.	₹150	**55%**
Account CUST-1857 (Professional)	**Urgent**	Immediate (24 hrs)	Deploy Automated Smart Dunning & UPI/Card Grace Period Alert.	Prevent involuntary churn driven by recurring invoice collection failures.	₹150	**55%**
Account CUST-1231 (Professional)	**Urgent**	Immediate (24 hrs)	Deploy Automated Smart Dunning & UPI/Card Grace Period Alert.	Prevent involuntary churn driven by recurring invoice collection failures.	₹150	**55%**
Account CUST-2185 (Professional)	**Urgent**	Immediate (24 hrs)	Escalate to Senior Customer Success Specialist for Root-Cause Review.	Address outstanding support tickets and remediate frustration points.	₹1,200	**40%**
Account CUST-2123 (Professional)	**Urgent**	Immediate (24 hrs)	Escalate to Senior Customer Success Specialist for Root-Cause Review.	Address outstanding support tickets and remediate frustration points.	₹1,200	**40%**

What-If Economic Projections and Breakeven Returns

Baseline Simulation Assumptions & Equations:

- Target Population: All High-Risk (31 accounts)
- Cost per Contacted Account: ¹450 | Assumed Success Rate: 35%
- Average Monthly Revenue: ¹2,427 | Retained Projection Horizon: 6 months
- Formula: Retained Revenue = (Targeted Accounts × Success%) × Avg MRR × Retained Horizon
- Formula: Net Economic Benefit = Total Retained Revenue " Total Campaign
- Formula: Return on Spend (ROI %) = (Net Benefit / Campaign Cost) × 100

Scenario	Intervention Strategy	Unit Cost	Win %	Budget	Retained	MRR Saved	Lifetime Rev	Net Gain	ROI %
Status Quo (No Action)	Zero intervention. Customers churn according to baseline attrition trends without recovery.	¹0	0%	¹0	0 accounts	¹0	¹0	¹0	**0%**
Targeted Digital Campaign	Automated dunning, personalized in-app guides, and behavioral email triggers at ¹220/contact.	¹220	25%	¹6,820	8 accounts	¹19,416	¹1,16,496	¹1,09,676	**1608.2%**
High-Touch Concierge Campaign	Dedicated 1-on-1 CSM check-in, product architecture audit, and tailored retention terms at ¹1,350/contact.	¹1,350	46%	¹41,850	14 accounts	¹33,978	¹2,03,868	¹1,62,018	**387.1%**
Active Custom Scenario	User-configured parameters: ¹450 35% success rate.	¹450	35%	¹13,950	11 accounts	¹26,697	¹1,60,182	¹1,46,232	**1048.3%**

ANALYTICAL LIMITATIONS & MANAGEMENT GOVERNANCE:

Campaign outcomes represent what-if financial projections based on user-supplied assumptions. Conversion lift may degrade with aggressive discount saturation or customer contact fatigue. Controlled A/B testing is strongly recommended
