WhatsApp AI Messaging Agent

DEMO / SIMULATION

Autonomous Message Understanding, Decision & Execution • MBA Business Analytics Lab

Meta Setup Guide (Steps A-H) | Test WhatsApp Connection | View Architecture | Credentials & Webhook

DEMO / SIMULATION MODE — WhatsApp API credentials are not configured in `.env`. The complete agent lifecycle will execute realistically, but no real WhatsApp message will be sent.

LIVE SETUP CHECKLIST — Meta WhatsApp Cloud API

Verify Checklist | Test First Real Message (hello_world)

Live verification state of your Meta WhatsApp Business Cloud connection. No item is marked complete until verified against the backend and Meta Graph API:

- [ ] Meta credentials configured — UNVERIFIED
  WHATSAPP_ACCESS_TOKEN and WHATSAPP_PHONE_NUMBER_ID in .env
- [ ] Access token detected — UNVERIFIED
  Missing or placeholder token
- [ ] Phone Number ID detected — UNVERIFIED
  Missing or non-numeric Phone ID
- [ ] API connection successful — UNVERIFIED
  Pending test connection with Meta Graph API
- [✓] Recipient configured — VERIFIED
  Personal Number: +917978439402
- [ ] Ready to send — PENDING
  Complete the checklist items above to enable live dispatch

Test Lab — Prebuilt Laboratory Scenarios

Click any test scenario to load it instantly into the autonomous agent workspace:

SCENARIO 1 • VALID MESSAGE
"Send a WhatsApp message to +919876543210 saying: Your meeting starts at 10 AM."
Expected: Valid E.164 • Confirmation Gate

SCENARIO 2 • INVALID NUMBER
"Send a WhatsApp message to 12345 saying: Hello"
Expected: Validation Failed (Too short)

SCENARIO 3 • EMPTY MESSAGE
"Send a WhatsApp message to +919876543210 saying: "
Expected: Validation Failed (Empty body)

SCENARIO 4 • MISSING API CONFIG
Demonstrates zero-config fallback to Demo / Simulation mode.
Expected: Simulation Mode Active

SCENARIO 5 • TEMPLATE MESSAGE
"Send template hello_world to +919876543210 in en_US"
Expected: Template Outbound Workflow

What should the agent do?

Natural language agent instruction

Send a WhatsApp message to +917978439402 saying, 'Your MBA assignment presentation is tomorrow at 10 AM.

Analyze Request | Clear

Compose WhatsApp Message

STRUCTURED VIEW

Recipient (Your Personal WhatsApp Number) Presets: Primary WhatsApp | Personal Number | Secondary Number | Test Number

+917978439402

Normalized: 917978439402 (12 digits)

Message Type

(•) Free-form (24hr Window) ( ) Template (Pre-Approved hello_world)

Message Text

to +917978439402 saying, 'Your MBA assignment presentation is tomorrow at 10 AM.

80 / 4096 characters

Requires 24-hr customer window under Meta policy

Autonomous Agent Lifecycle Pipeline

SIMULATION_COMPLETE

Real-time dynamic inspection of autonomous cognition, decision gate, and execution stages:

1 PERCEIVE
Ingested request payload (0 characters). Environment mode: DEMO / SIMULATION.

2 UNDERSTAND
Intent: SEND_WHATSAPP_MESSAGE (confidence: 1.00). Extracted Recipient: '+917978439402', Message: 'to +917978439402 saying, 'Your'

3 VALIDATE
E.164 Recipient format valid (+91 79784 39402). Message constraints met.

4 REASON
Free-form message type selected: subject to WhatsApp 24-hr customer service window. | No live Meta API credentials configured. Safe SIMULATION MODE active. | Executive Confirmation Gate is REQUIRED before message transmission.

5 DECIDE
Agent recommends dispatch to +91 79784 39402. Awaiting human approval via Confirmation Gate before invoking DEMO / SIMULATION.

6 ACT
Dispatched HTTP payload to DEMO / SIMULATION (250ms).

7 VERIFY
API accepted request with Message ID: SIM-wamid.50E8EF3C65804939

8 LOG
Action recorded to JSON audit log and persistent memory store.

Execution Status & Real API Response

API_ACCEPTED

CURRENT STATE	SENDER / API PHONE	MESSAGE ID (WAMID)	LATENCY
SIMULATION_COMPLETE	Simulated Sender (+1 555…	SIM-wamid.50E8EF3C658049…	250 ms

SIMULATION COMPLETE — No real WhatsApp message was sent. Synthetic ID: SIM-wamid.50E8EF3C65804939
